

LEARN TO DRAW

ANYIA

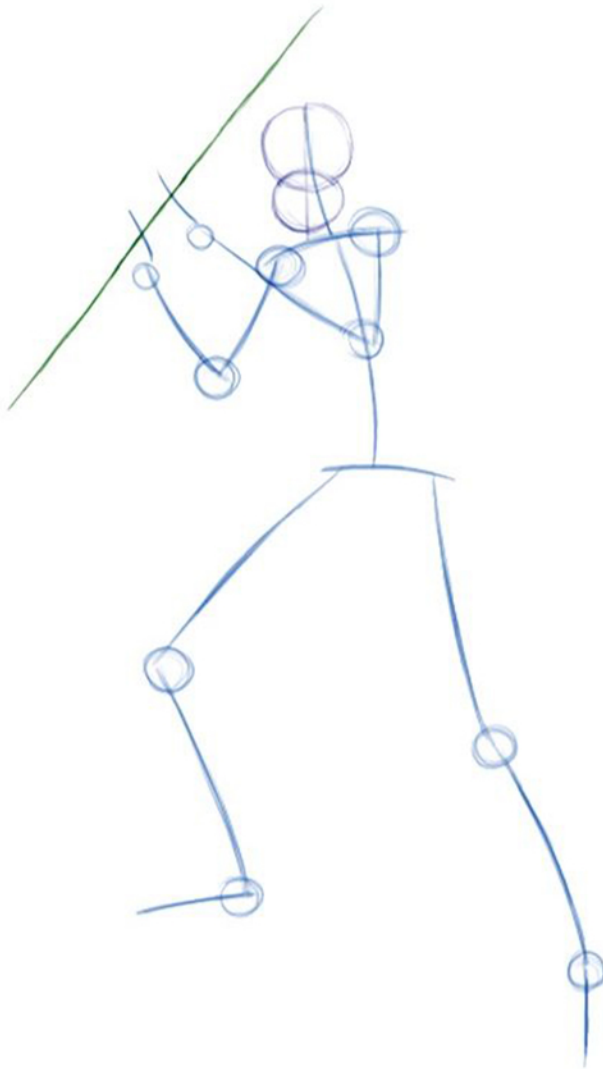

1

To begin your drawing of Anyia, you will first draw a stick figure as a guide for her body and her battle stick. The skeleton is what you will use to start developing your drawing. Draw your guides lightly so they can be easy to erase.

2

Next, draw circles for the head, shoulders, and joints of the arms and legs. You will use these circles as guides when creating the body shape.

3

Now, let's draw Anyia's body. Use nice smooth lines for the body and rugged lines for the battle stick. Don't forget to use your guides. When you finish drawing her body and battle stick, you can erase your skeleton and circle guides.

4

Continue the drawing by creating another guide for Anyia's hair. Next, draw her dress over the body. Then draw a guide for her belt.

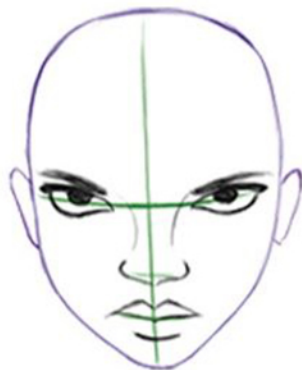

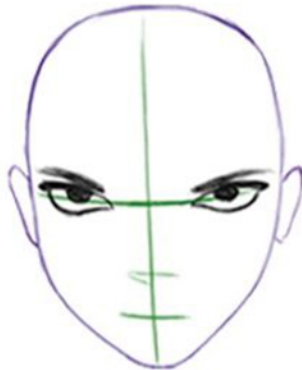

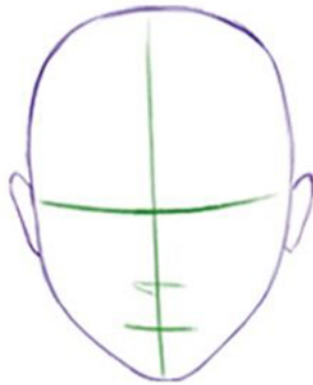

5

Now it's time for some details. Draw wavy lines over your guide for her hair. Then add details for her belt, arm, leg bands, and shoes. Don't forget to add the ears, fingers, and toes.

6

For the face, draw a vertical guideline down the middle. Next, draw a horizontal guideline between the ears. Make a couple of shorter lines below that for her nose and mouth. Then use your new guides to draw her facial features.

7

You are almost done! Draw some curvy lines to create a design on Anyia's dress.

Look at your drawing and erase any remaining guides. Now add the finishing touches and post your masterpiece.
